Adobe device licensing and expiry dates and Jamf – Oh my!
It's all Ben's fault.
The problem:
Adobe device license serial numbers have an expiry date. Adobe have the AdobeExpiryCheck command line tool you can run that'll tell you if you have a device license serial number and what the expiry date is.
This tool returns results that look like this:
That's a huge load of text and a date that's in a format we might want to change if we were to say, want to make it useful for our management tool of choice. Oh, and the AdobeExpiryCheck tool comes as a zip file download, so isn't really mass-deployment friendly, if we want to get it

G Suite Status Dashboard
G Suite Status Dashboard enables users and businesses to monitor the status of individual G Suite services. Users of G Suite can now view the status of individual services such as Gmail, Google Calendar, Google Docs, Google Sites and Google Video for businesses. Administrators of G Suite Premier Edition, Standard Edition, Partner and Education Edition can also view status of the Admin Control Panel.

```
'''
This is an example of how to send data to Slack webhooks in Python with the
requests module.
Detailed documentation of Slack Incoming Webhooks:
https://api.slack.com/incoming-webhooks

'''

import json
import requests

# Set the webhook_url to the one provided by Slack when you create the webhook at https://my.slack.com/services/new/incoming-
webhook_url = 'https://hooks.slack.com/services/T00000000/B00000000/XXXXXXXXXXXXXXXXXXXXXXXX'
slack_data = {'text': "Sup! We're hacking shit together @HackSussex :spaghetti:"}

response = requests.post(
    webhook_url, data=json.dumps(slack_data),
    headers={'Content-Type': 'application/json'}
)
if response.status_code != 200:
    raise ValueError(
        'Request to slack returned an error %s, the response is:\n%s'
        % (response.status_code, response.text)
    )
```
